

# ENTERPRISE, BACK-OFFICE APPLICATIONS PROPEL YOUR BUSINESS.

AN ORDER MANAGEMENT SYSTEM, PAYROLL APPLICATION AND CUSTOMER CALL CENTER THAT CONNECTS YOUR ORGANIZATION WITH CUSTOMERS AND EMPLOYEES.

## Don't Jeopardize Your Business Engine During an Upgrade

Now you don't have to. Validate your business-critical systems before they go live with Oracle® Applications Extension for Rational Performance Tester (RPT) from BSD. You'll eliminate risk, increase testing productivity, speed delivery, and ensure the quality and scalability of your business systems. Our solution automates and streamlines the testing process for optimal application performance.

## Execute Deployment with More Intelligent Testing

Oracle Applications Extension for RPT from BSD is your secret weapon for executing successful updates and new functionality rollouts. You'll strengthen confidence in your testers, managers, and most importantly - end users. Your Oracle E-Business Suite™ deployment will be more seamless, predictable and accurate.

Oracle Applications Extension for RPT from BSD automates and manages the testing lifecycle, including performance, load and stress testing. Our solution is built on the Eclipse open source IDE and is fully integrated with RPT for ultimate performance and flexibility.

## Get Proactive. Get BSD.

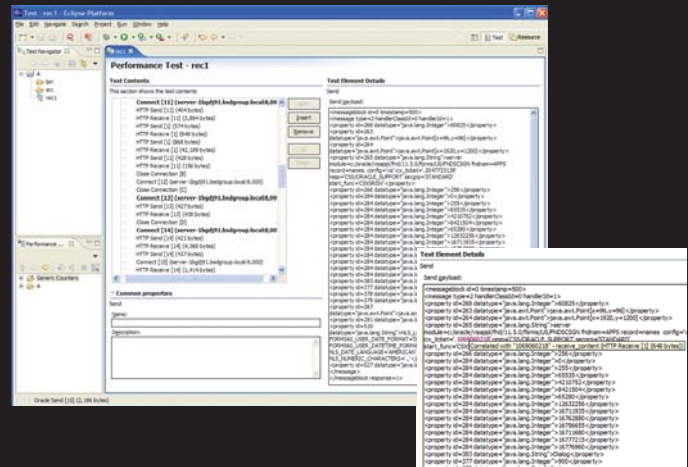

Oracle Applications Extension for RPT from BSD is a robust solution that helps you get proactive about exposing and eliminating problems in your business-critical systems. And because we are an IBM Premier Business Partner, you can be confident that you're getting an integrated solution that is proven to simplify the creation, execution and results analysis of multi-user performance testing.

## ORACLE APPLICATIONS EXTENSION FOR RPT INCLUDES:

**Oracle Apps Recorder.** Capture, record and playback transactions using Oracle NCA technology. You get full application visibility, including screen transactions, data entry, and server responses. This speeds the process and increases accuracy and problem resolution time for testers.

**Oracle Apps Protocol Browser for Test Editing.** Modify scripts, read and edit tests without coding. Easily see and highlight individual objects within the application.

**Oracle Apps Performance Reports.** Identify performance bottlenecks and produce reports on slow pages, server health, screen throughput, and response times for all pages throughout the entire test.
